General Information

Course Overview

Join us at the beautiful Ritz Carlton Kapalua Resort on the island of Maui for the *4th Mayo Clinic International Spine Symposium*, being held February 1 – 5, 2009.

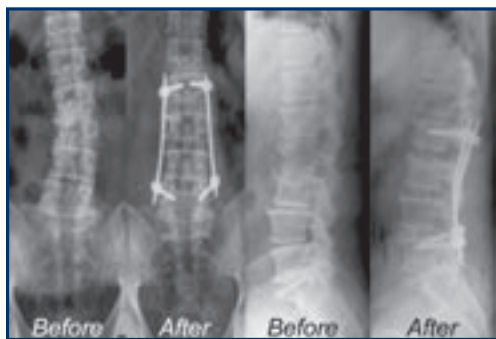

This annual five day CME event features the latest in new treatment strategies and techniques for orthopedists, neurosurgeons, neuroscientists, and spine care professionals involved in treating patients with spinal disorders. The course rotates to locations among the four Hawaiian Islands of Oahu, Kaua'i, Maui and the Big Island in an effort to attract participants from around the world.

Our 2009 program focus:

- Trauma
- Minimally invasive spine surgery
- Non-operative spine care

The five, half-day sessions are designed to be highly interactive. Attendees and faculty interact in a casual, yet dynamic forum that features debates, panel discussions, case presentations, evidence-based reviews, and our unique “unknowns” challenge, *Spinal Curve Ball*.

Our continuing goal is to recruit outstanding surgeons from the United States and around the world. Our guest faculty members are among the top practitioners in the field and ensure a dynamic and challenging learning experience.

Target Audience

This program is specifically designed for orthopedic surgeons, neurosurgeons, and spine care providers.

Program Highlights

- Live PDF download. Bring your laptop and access faculty presentations real-time, as they are presented
- Point/counterpoint debates on key controversial areas in spine trauma, minimally invasive techniques and non-operative spine care
- Innovative learning formats that allow audience direction and interaction with faculty
- *Spinal Curve Ball*, an “unknown” cases challenge presented daily to broaden awareness of unusual spinal conditions
- Abstract presentations in a continuous E-poster session
- Electronic syllabus of conference proceedings
- Interactive Audience Response System (ARS)
- Attendees case review and consultation
- Informal breakfast case discussion sessions with faculty experts
