

## Children's Center Physician Update

January 2023

Novel technique to secure Nuss bar during pectus excavatum procedure

### Patient Care

#### Supporting teens and young adults with type 1 diabetes

Because of the unique challenges adolescents face, the pediatric and adult endocrinology divisions at Mayo Clinic have partnered to form a clinic specifically designed to support young adults through the transition to an adult model of care.

#### Cutting-edge neuroimaging and models guide pediatric brain tumor care

Mayo Clinic has developed unique neuroimaging modalities, and is the largest point-of-care manufacturing facility for 3D-printed, life-size, patient-specific models in the United States.

[Learn more](#)

#### Pediatric ventricular arrhythmia in a normal heart warrants investigation

Ventricular arrhythmia is a rare occurrence in the pediatric population and necessitates further work-up and possibly longitudinal follow-up.
