

Children's Center Physician Update

June 2023

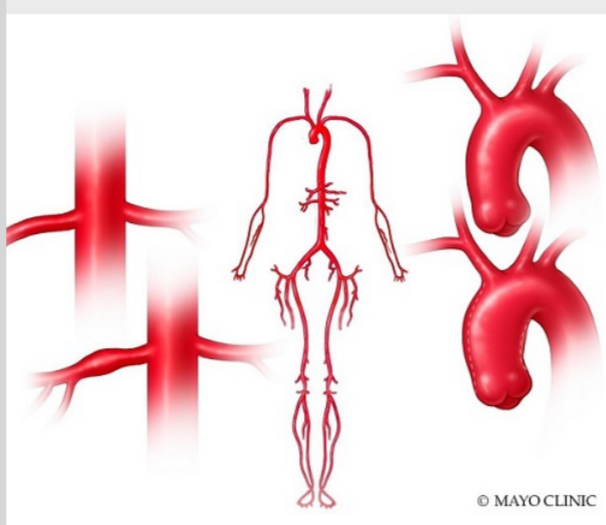

Patient Care

Mayo Clinic specialists perform first pediatric transplant with heart-in-a-box technology

Mayo Clinic Children's Center heart transplant specialists have completed their first pediatric transplant with the "heart-in-a-box" perfusion system, noted for sustaining donor hearts while awaiting transplant.

Fertility preservation services for children with brain tumors

Mayo Clinic Children's Center is one of the few centers that offers fertility preservation services to children who are treated for brain cancer. Multidisciplinary specialists in the Mayo Clinic Pediatric Fertility Preservation Program work closely with pediatric neuro-oncologists to discuss options with patients and their families.
