

## Digestive Diseases Physician Update

January 2023

### Patient Care

#### Early identification and treatment are critical to improve outcomes in patients with CVID

Mayo Clinic gastroenterologists discuss clinical presentations, diagnostic considerations and therapeutic options for the GI manifestations of common variable immunodeficiency (CVID).

[Learn more](#)

#### Individuals with chronic idiopathic constipation (CIC) and irritable bowel syndrome with constipation (IBS-C) experience multiple burdens

Identifying these issues helps clinicians understand patients' experiences and develop effective treatment strategies.
