Research

Research fuels new insights into diagnosis and treatment approaches for cholangiocarcinoma

Sumera I. Ilyas, M.B.B.S., and colleagues highlight key areas of research that are helping clinicians better understand and treat cholangiocarcinoma.

[Learn more](#)

Researchers study how accurately endoscopists grade morphology and predict histopathology of colorectal lesions in patients with inflammatory bowel disease

Results show low interobserver agreement and low accuracy among endoscopists determining Paris and modified Paris classifications, lesion borders, and histopathology predictions.

[Learn more](#)

Prior authorization process affects clinicians and management of patients with inflammatory bowel disease

In a published letter to the editor, Mayo Clinic physicians discuss the impact of the prior authorization process and advocate for change that prioritizes evidence-based treatment decisions.
