

Risk of respiratory illness spread is mitigated by your actions and PPE

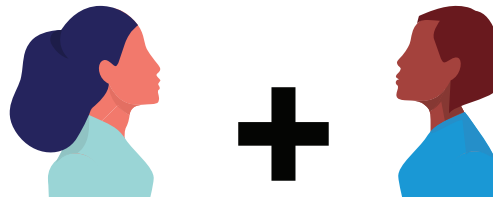

Hand washing and social distancing are foundational to stop the spread of respiratory illness.

In addition to these measures, **masks** and sometimes **eye protection** play a key role.

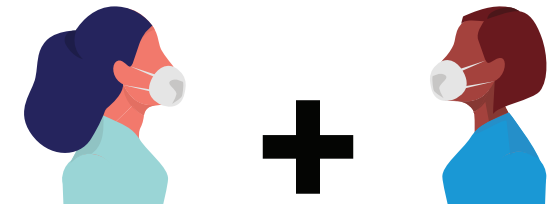

HIGH-RISK OF TRANSMISSION

Close contact without masks

LOW-RISK OF TRANSMISSION

Close contact with both persons masked

MODERATE-RISK OF TRANSMISSION

Close contact with only one person masked

Close contact with one person masked, with eye protection
