

# Cardiovascular Diseases & Cardiac Surgery Physician Update

March 2023

Mitral valve surgery in patients with severe mitral annulus calcification [▶](#)

## Research

### Identifying at-risk patients to minimize complications

Postoperative atrial fibrillation (POAF) is one of the most common complications after cardiac surgery, yet data was limited in adults with congenital heart disease (CHD). A retrospective Mayo Clinic study was conducted to identify CHD patients at a higher risk of POAF — providing a foundation for assessing prophylactic therapies.
