

# Obstetrics and Gynecology Physician Update

July 2024

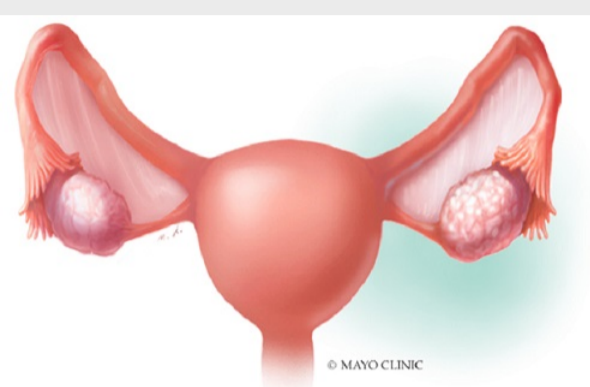

## Patient Care

### Number of women who have experienced premature or early menopause higher than expected

Mayo Clinic investigators were surprised to find higher numbers of premature menopause and early menopause than they anticipated.

### Tubal ligation, hysterectomy alone or with oophorectomy, and CVD risk

A multicenter study indicated that hysterectomy — alone or combined with oophorectomy — and tubal ligation may increase cardiovascular disease risk. The Journal of Women's Health published these findings.

## Research

### New findings may impact ovarian cancer treatment prediction and earlier diagnosis

A study published in Scientific Reports describes the finding of a distinct ovarian cancer microbiome. This discovery may benefit earlier disease diagnosis and prediction of treatment effectiveness.
