

Otolaryngology Physician Update

October 2024

Patient Care

Transoral robotic surgery (TORS) helps hundreds of patients with head and neck cancers

Mayo Clinic surgeons are using this latest technology as an opportunity to treat complex cancers and increase Otolaryngology's surgical capabilities.

Research

Predictors of chronic rhinosinusitis (CRS) in transplant recipients

A little more than 30% of transplant recipients with CRS had an increased prevalence of previous endoscopic sinus surgery, allergic rhinitis and recurrent acute rhinosinusitis in the pretransplant period compared with the non-CRS group.
