

Pulmonology Physician Update

April 2022

Patient Care

Transplant specialists identify options for patients with severe lung disease

A lung transplant surgeon discusses Mayo Clinic's collaboration with local physicians to determine the best treatment for each patient, including transplant, clinical trials or other therapies, or transplant prehabilitation.

Research

Corticosteroid use in pneumonia may be associated with improved clinical outcomes

Novel strategies that consider patient-specific variables, including markers of inflammation, may result in an individualized approach to corticosteroid use in the treatment of patients with community-acquired pneumonia.
