

Urology Physician Update

June 2023

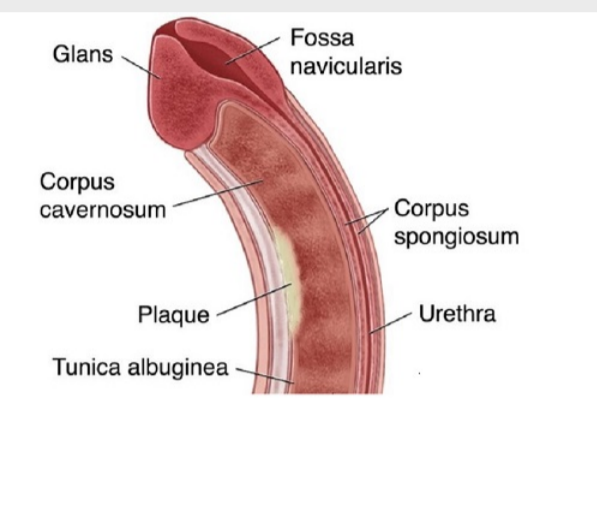

Patient Care

Sacral neuromodulation to treat overactive bladder in men

Although sacral neuromodulation (SNM) is historically used to treat refractory overactive bladder and nonobstructive urinary retention in females, a urology consultant at Mayo Clinic is successfully implementing this therapy in male patients.

In-office, streamlined process for vasectomy reversals

The Mayo Clinic Men's Health team has performed over 350 in-office vasectomy reversals. A new operating microscope that is used for the procedure helps improve precision and patient outcomes.
